DEAD SEA ADVANTAGES

It is widely known that there are minerals in sea salt, but the unique composition of the Dead Sea water apparently makes its salt more potent.

The minerals that can be found in the Dead Sea water are Magnesium, Sodium, Calcium, and Potassium; but the highest concentration is that of the electrolytes chloride and bromide.

Prominent minerals of the Dead Sea mud are Silicon Dioxide, Calcium Oxide, Aluminum Oxide, Magnesium Oxide, Iron (III) Oxide, Sodium Oxide, Potassium Oxide, Titanium (IV) Oxide, Sulfur Oxide, Phosphorous Pentoxide, Chloride, and Bromide.
